Effective antimicrobial and digestive supplements
Potent gemmotherapy macerates
This product guide is intended for residents of Canada only.

The aim of this comprehensive product guide is to assist in building more effective and successful patient treatment strategies. The product guide is to be used as an adjunct to Seroyal Continuing Education and is not intended to be utilized as a diagnostic tool nor replace any other required education. The remedies indicated in this product guide are potent medicines that can have profound therapeutic effects on patients. As with any intervention, the dosage may need to be adjusted for those with chronic conditions, very sensitive individuals and those taking multiple medications. Practitioners are solely responsible for the care and treatment provided to their own patients. The information provided by the speaker or speakers in the Seroyal Continuing Education program together with any written material provided do not necessarily represent the views of Seroyal and are not intended as medical advice or an endorsement of any products. This information is for practitioner use only.

Plant Antimicrobial & Digestive Compounds

Natural compounds with broad-spectrum antimicrobial activity

Plant antimicrobial compounds have a long history of traditional usage for their antibacterial, antiviral, antiparasitic, antiprotozoal and antifungal properties. Safer and more cost-effective than their synthetic counterparts, plant antimicrobial compounds are highly versatile. They can be prescribed independently, or in combination with other therapeutic options for a wider therapeutic spectrum.

Plant-Based Digestive Compounds

Plant compounds are also effective in helping to support digestion. Plant extracts have been clinically shown to stimulate gastric secretion and increase digestive tract tone,\(^1\) reduce nausea and bloating, minimize gastric motor disturbances, and improve gastric emptying rates in patients with dyspepsia.\(^2\)

Restoring Microflora to a Healthy Balance

GENESTRA BRANDS Candaclear Four contains a potent combination of natural antimicrobial compounds along with a therapeutic dose of HMF probiotics to restore a naturally healthy gut flora. This 30 day therapy is provided in individual serrated strips (containing one tablet and three capsules) that deliver:

- 25 billion CFU of human-sourced probiotics clinically proven to significantly reduce symptoms of irritable bowel syndrome

- N-acetyl glucosamine (NAG), L-glutamine, and β-carotene to help support digestive system health

- Vitamin A to help maintain immune function

- Cinnamon, which is traditionally used in Herbal Medicine to help relieve gastrointestinal complaints

- Allicin, which has effective antimicrobial properties
### Allisyn

**HERBAL FORMULA**

**Allisyn** contains a synergistic combination of freeze dried garlic and cinnamon oil.

Allicin is the primary active component in garlic: it is formed from enzymatic reactions initiated when garlic cloves are cut or crushed. Since the high temperatures needed for conventional drying techniques can denature the enzymes necessary for allicin formation, Seroyal uses the patented CYRO-di freeze-drying process to increase allicin yields. Garlic bulb is traditionally used in Herbal Medicine to help relieve the symptoms associated with upper respiratory tract infections and catarrhal conditions.

Cinnamaldehyde is the key active ingredient of cinnamon bark, which is traditionally used at doses of 2.4 g per day in Herbal Medicine to help relieve the symptoms associated with upper respiratory tract infections and catarrhal conditions.

In an in vitro study, alkaloid extracts from goldenseal were effective at inhibiting the growth of Helicobacter pylori. Goldenseal is traditionally used in Herbal Medicine to help alleviate infectious and inflammatory conditions of the digestive tract, such as gastritis.

In an in vitro study, alkaloid extracts from goldenseal were effective at inhibiting the growth of Helicobacter pylori. Goldenseal is traditionally used in Herbal Medicine to help alleviate infectious and inflammatory conditions of the digestive tract, such as gastritis.

### Berberis Formula

**HERBAL FORMULA**

**Berberis Formula** combines concentrated plant extracts from barberry (Berberis vulgaris), Oregon grape (Mahonia aquifolium) and goldenseal (Hydrastis canadensis). Berberis Formula is traditionally used in Herbal Medicine as a bitter to aid digestion, and helps to relieve digestive disturbances such as dyspepsia. The goldenseal used in Berberis Formula is traditionally used in Herbal Medicine to help alleviate infectious and inflammatory conditions of the digestive tract, such as gastritis.

In an in vitro study, alkaloid extracts from goldenseal were effective at inhibiting the growth of Helicobacter pylori. Goldenseal is traditionally used in Herbal Medicine to help alleviate infectious and inflammatory conditions of the digestive tract, such as gastritis.

### Black Walnut Capsules

**HERBAL FORMULA**

**Black Walnut Capsules** contain a combination of quassia, black walnut and pumpkin seeds, which are traditionally used in Herbal Medicine as a vermifuge (an anthelmintic agent that destroys or expels parasitic intestinal worms). Black Walnut Capsules also provide gentian, which is traditionally used in Herbal Medicine to help relieve digestive disturbances, as well as yarrow, sweet wormwood and clove.

Pumpkin seed extracts are traditionally used in Chinese medicine to treat tapeworm infections. In a human clinical trial of adults infected with *Taenia* spp. tapeworms in their upper small intestine, a high dose of pumpkin seeds was effective in promoting tapeworm expulsion.

**Non-medicinal ingredients:** Hypromellose, cellulose, silica
**Black Walnut Combination #1**

Contains a mixture of ingredients that are traditionally used in Herbal Medicine to help relieve digestive disturbances (dyspepsia), and as a digestive tonic and bitter to help stimulate appetite and aid digestion. Black Walnut Combination #1 provides concentrated plant extracts from black walnut leaf, quassia, yarrow, wormwood flower and clove bud.

**Promote intestinal balance**

**Utilizing delayed release allicin**

**Why allicin?** Allicin is a wide spectrum plant-based active compound that has a minimal effect on the beneficial lactic acid flora of the gastrointestinal (G.I.) tract. The following is a visual example through electron micrographs demonstrating the effectiveness of allicin, in vivo, on cells of *E. Coli* (effectiveness can be visually measured by the amount of dissipation of *E. Coli*).

Can Albex 30X and Can Albex 500X are homeopathic preparations containing Candida albicans yeast at 30X and 500X dilutions. Can Albex 30X and 500X part of the unique Can Albex Candiasis Program, which is specifically formulated according to the usage guidelines of the Homeopathic Materia Medica.

**Can Albex 30X**

Each Drop Contains:
- Candida albicans [30X]

Non-medicinal ingredients: Ethanol (beet)

**Can Albex 500X**

Each Drop Contains:
- Candida albicans [500X]

Non-medicinal ingredients: Ethanol (beet)

**Candicin** is a unique combination of essential oils from oregano, clove, wormwood, evening primrose, and ginger, which is traditionally used in Herbal Medicine to help relieve digestive upsets and disturbances such as flatulence and abdominal bloating.1

**Candicin**

**HERBAL FORMULA**

Each Capsule Contains:
- Oregano (Origanum vulgare) Flowering Tops Essential Oil Std. Extract (70% Carvacrol) .................... 95 mg
- Clove (Syzygium aromaticum) Leaf Essential Oil ........ 45 mg
- Ginger (Zingiber officinale) Root Essential Oil .......... 45 mg
- Wormwood (Artemisia absinthium) Leaf Essential Oil . . . 45 mg
- Evening Primrose (Oenothera biennis) Seed Oil ........... 20 mg

Non-medicinal ingredients: Hypromellose, silica, magnesium stearate

**Recommended Adult Dose:** Take one capsule two times daily with meals, a few hours before or after taking supplements containing iron, zinc, calcium or copper, or as recommended by your healthcare practitioner. For occasional use only.

Fungisode
HOMEOPATHIC PREPARATION

Fungisode is a homeopathic medication containing a combination of 16 different homeopathic extracts. Fungisode includes Lycopodium clavatum, which is used in homeopathy to treat digestive disturbances and diarrhea,1 Muriaticum acidum which is used in homeopathic medicine to relieve septic conditions,2 and Oxalicum acidum, which is used in homeopathy for the relief of gastritis.3 Fungisode is part of the unique Can Albex Candidiasis Program, which is specifically formulated according to the usage guidelines of the Homeopathic Materia Medica.

Each Drop Contains Equal Parts of:

Echinacea purpurea
(Purple cone-flower whole plant) .................. 3X
Calcarea carbonica
(Impure calcium carbonate from oyster shell) ........ 8X
Oxalicum acidum
(Oxalic acid) ..................................... 8X
Arsenicum album
(Arsenic trioxide) ..................... 4CH
Berberis vulgaris
(Barberry root bark) ..................... 4CH
Chelidonium majus
(Calandine whole plant) ............. 4CH
Sulphur (Sublimed sulfur) ............. 4CH
Hepar sulphuri calcarea
(Impure calcium sulphate) ................. 5 CH
Kreosote (Creosote from coal tar) ............. 5CH
Lycopodium clavatum
(Clubmoss spore) .................. 5CH
Mercurius solubilis
(Hahnemann’s soluble mercury) .......... 5CH
Nitricum acidum
(Nitric acid) ............................. 5CH
Sepia officinalis
(Sepia inky juice) .................... 5CH
Candida albicans
(Fungus) ................................ 12X
Carbo vegetabilis
(Vegetable charcoal) ................ 7CH
Muriaticum acidum
(Muriatic acid) .......................... 7CH

Non-medicinal ingredients: Ethanol (grain), purified water

Recommended Dose: Adults and Adolescents (12 years and older): Take ten drops two to three times daily or as recommended by your healthcare practitioner.
Children (1-11 years): Take five drops two to three times daily or as recommended by your healthcare practitioner. To be taken 20 minutes away from food. Place drops directly under the tongue or into 1/4 oz. of water. For prolonged use, consult your healthcare practitioner.
